

## When things get heated BlueHeat® keeps you cool

BlueHeat® is your best way to 'beat the heat'. This lightweight heat tested glove is the everyday solution to temperature affected items up to 150°C\*.

The glove is made from comfortable, cool cotton and void filled coated dipped latex to produce a super wrinkle finish that minimises the contact surface area of the glove on high temperature items. Tested to EN 407 class 2 for heat resistance and level 3 for contact heat.

\* Not suitable for welding or any open flame.
